Farmer survey · kharif 2026 · completed forms

Roots & Reflectance · Sawardoh and Karanja Ghadge, Karanja taluka, Wardha

> These answers were given by the farmers in person on 25 October 2026, and each farmer signed or put a thumb impression under their answers. Some figures were clarified by asking again on 1 November 2026 (noted on each form). Farmers are identified only by code; no name, Aadhaar, bank, 7/12 or phone number is kept. Signatures are blurred for privacy. Rupees, quintals (q) and hectares (ha). Translated from the Marathi original.

All seven fields together

	Normal year	2026
Sawardoh Field 2 (A)	Rs 55,600	-Rs 14,010
Sawardoh Field 3 (A)	Rs 51,100	-Rs 20,890
Sawardoh Field 1 (E)	Rs 20,600	-Rs 1,500
Sawardoh Field 4 (E)	Rs 50,700	-Rs 13,600
Sawardoh Field 5 (B)	Rs 43,900	Rs 4,150
Karanja Field 1 (C)	Rs 9,100	-Rs 13,300
Karanja Field 2 (D)	Rs 51,600	-Rs 6,000
Margin, seven fields	Rs 2,82,600	-Rs 65,150

This year six of the seven fields are at a loss; only field 5 (some canal water) is slightly positive. Cotton and tur are still standing, so their 2026 figures are for the expected harvest.

Sawardoh field 2 (cotton, tur, orange) · field 3 (cotton)

q1	Did you receive the field map, area and account? When?	Yes. First account (map, area, cost and return) around 14 October; field card and this form on 25 October 2026.
q2	Does the area on the 7/12 match the mapped area?	Field 3: matches (7/12 0.78 ha, walked 0.777 ha). Field 2: small difference (the 7/12 area is less than the walked area).
q3	Did the figures in the account seem right?	Yes, no change.
q4	How much has this season produced, or will it produce?	Field 2: cotton 6.3 q, tur 1.5 q; field 3: cotton 6.7 q (expected; crop standing). Picking has started: 1.0 q from field 3 so far, at the farmers' union collection centre. Picking labour Rs 300/day.
q5	Have you sold? At what price?	Not sold yet. With no rain, supply is low, so prices may rise.
q6	How much does a normal rainfall year produce?	Field 2: cotton 14.7 q, tur 3.3 q; field 3: cotton 17.3 q.
q7	Which crop is insured this year? For what area? What premium?	Field 2: orange (as recorded in the e-Peek Pahani); area and premium not known. Field 3: cotton; premium roughly Rs 600-1,500 (exact figure not known). All fields are insured.
q8	Did you report the loss? How and when? Was a panchnama done?	Yes. At the agriculture office, 1 October 2026. A panchnama was done.
q9	Have you received insurance compensation? Last year?	Not known.
q10	Will you insure next year?	Yes.

Cost and return (each field, total rupees)

	Field 2 · Normal year	Field 2 · 2026	Field 3 · Normal year	Field 3 · 2026
Cost	Rs 88,400	Rs 79,800	Rs 87,300	Rs 76,500
Production (q)	cotton 14.7, tur 3.3	cotton 6.3, tur 1.5	cotton 17.3	cotton 6.7
Price (Rs/q)	cotton 8,000, tur 8,000	cotton 8,300, tur 9,000	cotton 8,000	cotton 8,300
Income	Rs 1,44,000	Rs 65,790	Rs 1,38,400	Rs 55,610
Margin	Rs 55,600	-Rs 14,010	Rs 51,100	-Rs 20,890

q11	Was the e-Peek Pahani done? Is the crop recorded correctly?	Done through the agriculture assistant (krushi sahayak). The crop is recorded correctly.
q12	Do you know Karanja taluka is on the drought list? Any concession or help received?	Yes, aware. No concession or help received yet.
q13	Loan waiver: has your name come in the list?	Name not in the list yet; it may come in a later list.
q14	What other government help did you receive this year?	No drought help. The regular PM-Kisan / Namo Shetkari instalments are received.
q15	Was the field card useful?	Very useful.
q16	What did you do or decide after seeing the card?	Checked the insurance; checked the e-Peek record (it was correct); checked the area; started writing down costs.
q17	If there is a loss in future, will you keep dated photos?	Yes.
q18	What will you sow in rabi? What is the water source?	Nothing in rabi. Usually wheat, but not this year because there was no rain. Water: well and borewell, but little water from either because groundwater is low; farming is mostly rain-fed.
q19	What was the biggest problem this year?	No rain, harsh sun.
q20	If you could tell the government one thing, what would it be?	Help should reach farmers quickly, because the situation is very bad.
h	Whole farm: costs, annual worker, pump, tractor, family labour, lease	These two fields' kharif only: cost good year Rs 1,75,700, this year Rs 1,56,300; income good year Rs 2,82,400, this year Rs 1,21,400. Whole-farm, annual-worker, pump and tractor figures not known exactly; most is spent on machinery and irrigation, then labour. No family labour; all work hired. No land leased in or out.

Note: All cost figures as in the 14 October account; the farmer confirmed them unchanged. This year's income is calculated from the yields the farmer gave.

Consent: to use this information in the study without the farmer's name, yes. To use field photos without faces, yes. Receipt: map, measured area and account received, yes.

Sawardoh field 1 (cotton, tur) · field 4 (cotton, tur, orange)

q1	Did you receive the field map, area and account? When?	Yes. First account (map, area, cost and return) around 14 October; field card and this form on 25 October 2026.
q2	Does the area on the 7/12 match the mapped area?	Matches.
q3	Did the figures in the account seem right?	Yes. Only the total cost of field 1 changed (below).
q4	How much has this season produced, or will it produce?	Field 1: cotton 2.2 q, tur 0.3 q; field 4: cotton 6.1 q, tur 1.2 q (expected; crop standing). Lower than usual because of the drought. Picking not started yet; it will start soon.
q5	Have you sold? At what price?	Not sold yet. Expected price: cotton Rs 8,300, tur Rs 9,000.
q6	How much does a normal rainfall year produce?	Field 1: cotton 4.9 q, tur 0.8 q; field 4: cotton 13.7 q, tur 3.0 q.
q7	Which crop is insured this year? For what area? What premium?	Field 1: cotton, 0.22 ha, premium Rs 400. Field 4: cotton, 0.62 ha, premium Rs 1,200.
q8	Did you report the loss? How and when? Was a panchnama done?	Yes. At the agriculture office, 1 October 2026. A panchnama was done.
q9	Have you received insurance compensation? Last year?	Not yet this year; last year not known.
q10	Will you insure next year?	Yes.

Cost and return (each field, total rupees)

	Field 1 · Normal year	Field 1 · 2026	Field 4 · Normal year	Field 4 · 2026
Cost	Rs 25,000	Rs 22,500	Rs 82,900	Rs 75,000
Production (q)	cotton 4.9, tur 0.8	cotton 2.2, tur 0.3	cotton 13.7, tur 3.0	cotton 6.1, tur 1.2
Price (Rs/q)	cotton 8,000, tur 8,000	cotton 8,300, tur 9,000	cotton 8,000, tur 8,000	cotton 8,300, tur 9,000
Income	Rs 45,600	Rs 21,000	Rs 1,33,600	Rs 61,400
Margin	Rs 20,600	-Rs 1,500	Rs 50,700	-Rs 13,600

q11	Was the e-Peek Pahani done? Is the crop recorded correctly?	Done through the agriculture assistant (krushi sahayak). The crop is recorded correctly.
q12	Do you know Karanja taluka is on the drought list? Any concession or help received?	Yes, aware. No concession or help received yet.
q13	Loan waiver: has your name come in the list?	Name not in the list yet; it may come in a later list.
q14	What other government help did you receive this year?	No drought help. The regular PM-Kisan / Namo Shetkari instalments are received.
q15	Was the field card useful?	Very useful.
q16	What did you do or decide after seeing the card?	Checked the insurance; checked the e-Peek record (it was correct); checked the area; started writing down costs.

Karanja Ghadge field 1 (about 80% tur, 20% soyabean)

q1	Did you receive the field map, area and account? When?	Yes. First account (map, area, cost and return) around 14 October; field card and this form on 25 October 2026.
q2	Does the area on the 7/12 match the mapped area?	Matches.
q3	Did the figures in the account seem right?	Yes. The figures in the table below are the farmer's.
q4	How much has this season produced, or will it produce?	Soyabean 1.5 q (harvested); tur 0.7 q (expected; crop standing).
q5	Have you sold? At what price?	Soyabean not sold yet; price Rs 6,500. Expected tur price Rs 8,500.
q6	How much does a normal rainfall year produce?	Soyabean 3 q, tur 3 q. Prices: soyabean Rs 5,700, tur Rs 8,000.
q7	Which crop is insured this year? For what area? What premium?	Soyabean, 0.79 ha, premium Rs 800.
q8	Did you report the loss? How and when? Was a panchnama done?	Yes. At the agriculture office, 1 October 2026. A panchnama was done.
q9	Have you received insurance compensation? Last year?	No insurance compensation yet.
q10	Will you insure next year?	Yes.

Cost and return (each field, total rupees)

	Field 1 · Normal year	Field 1 · 2026
Cost	Rs 32,000	Rs 29,000
Production (q)	soyabean 3, tur 3	soyabean 1.5, tur 0.7
Price (Rs/q)	soyabean 5,700, tur 8,000	soyabean 6,500, tur 8,500
Income	Rs 41,100	Rs 15,700
Margin	Rs 9,100	-Rs 13,300

q11	Was the e-Peek Pahani done? Is the crop recorded correctly?	Done through the agriculture assistant (krushi sahayak). The crop is recorded correctly.
q12	Do you know Karanja taluka is on the drought list? Any concession or help received?	Yes, aware. No concession or help received yet.
q13	Loan waiver: has your name come in the list?	Name not in the list yet; it may come in a later list.
q14	What other government help did you receive this year?	No drought help. The regular PM-Kisan / Namo Shetkari instalments are received.
q15	Was the field card useful?	Very useful.
q16	What did you do or decide after seeing the card?	Checked the insurance; checked the e-Peek record (it was correct); checked the area; started writing down costs.
q17	If there is a loss in future, will you keep dated photos?	Yes.
q18	What will you sow in rabi? What is the water source?	Rabi not decided yet.
q19	What was the biggest problem this year?	No rain, harsh sun.
q20	If you could tell the government one thing, what would it be?	Help should reach farmers quickly, because the situation is very bad.
h	Whole farm: costs, annual worker, pump, tractor, family labour, lease	Cost good year about Rs 32,000, this year about Rs 29,000; income good year Rs 41,100, this year Rs 15,700. Tractor hired. No family labour; all hired. The land belongs to an acquaintance; nothing is paid for it.

Note: The first soyabean figures (4.0 q this year, 14.6 q in a normal year) and the cost did not fit the crop mix (20% soyabean). On 1 November 2026 they were checked again and the farmer confirmed the corrected figures above. Costs are approximate.

Consent: to use this information in the study without the farmer's name, yes. To use field photos without faces, yes. Receipt: map, measured area and account received, yes.
